

Bookstore Renovation Southern Illinois University @ Edwardsville

Services: *General Contracting
Rough & Finish Carpentry
Fixture Installation*

This renovation project required the complete removal and replacement of all interior finishes in SIUE's university student bookstore, totaling approximately 12,000 square feet. Over 800 man hours of finish carpentry was performed to install over 900 pieces of new bookstore fixtures and store finishes.

This project was completed in a high student traffic area without incident, within the requested time period and with only one change order.

Additionally, Limbaugh coordinated the installation of new HVAC equipment, a new fire suppression system, and new lighting and PA system.
